

Reliable. Durable. Beautiful. Experience drives the advantages of Roller Blinds by Country.

Designed, tested, refined. Rollers by Country have evolved to be the very best.

Clean, streamlined and elegant, Indoor Roller Blinds open up options for bold looks and a clean aesthetic. So what's the Country difference? Put simply, our blinds have evolved through three decades over which meaningful refinements have made their way through feedback from homeowners right back to where we make them.

The result of this experience is a range of Indoor Roller Blinds that looks superb, functions faultlessly and continues to do so, year after year.

Geared for the long run

Our chain drive is geared for easy, low-effort operation, even with heavy blinds. A special gear ratio makes all the difference, solving the dreaded slipping problem that can affect inferior designs in the long run. We can add booster springs for the biggest of blinds, and even our chains are better, created as a continuous loop with no joiners to fail.

It pays to look into tubes.

Country offers aluminium top tubes in a wide range of sizes, simply because the optimum tube diameter eliminates unsightly sag in Roller Blinds. One size definitely doesn't fit all – which is why we pay close attention to this important detail at the design and quoting stage.

A high-tech table for a better roll

Our computer-controlled vacuum table sucks the fabric perfectly flat onto its surface so that any potential flaws can be spotted before manufacture begins. A gantry-mounted cutting wheel then creates perfectly straight cuts so that your blinds roll beautifully.

A Country solution to common bracket problems

At Country we believe that double blinds on a common bracket hold more advantages for the seller than the homeowner – and we'd prefer a happy customer before and after installation. So our design preference sees the mesh blind fitted inside the recess, with the blackout blind outside the reveal, fitted to the pelmet and overlapping the architrave. The result is no gaps, better blackout and a cleaner look. Need a demonstration? Just speak to one of our Consultants.

Mullions, reverse rolling and a cleaner finish.

Mullions on the back of a door can make fitting blinds inside the recess a real challenge. This is where our Country experts working with you can make all the difference to the final look. In special cases we will first consult with you before reversing the roll of the blind so that the drop is perfect and the whole blind fits neatly inside the recess. It's not ideal for large doors and it's not something we do at every installation, but it's one more example of how experience, expertise and communication can deliver a great finish.

Motorisation for minimalism.

On outdoor Roller Blinds, motorization is often purely about practicality. Indoors, it can make a real difference to aesthetics. No need for chains means an even cleaner look and push-button operation can help a blind effectively disappear when rolled up. Our 240 volt and 12 volt versions are maintenance-free, operated by remote, and can be paired to an App for operation with devices such as Google Home.

The Country Blinds difference

Trusted through time

Three decades in business has earned Country Blinds the trust of home and business owners all over South Australia. Every year, word-of-mouth recommendations from happy Country customers mean our reputation for excellence in products and service just keeps growing.

We make it, we install it.

Country Blinds is a family-owned, factory-direct supplier, manufacturing in our Adelaide Hills factory and installing all over the state with no compromises. That means our own installers take care of every single job. Because we make and install everything ourselves, we stand behind our products and our workmanship.

Value

Real value comes from a business with the ability to create a bespoke product tailored to your own home, perfectly suited to your décor and lifestyle. When it comes to your home, 'off-the-rack' is often just another way of saying 'compromise'. We never compromise on value and there is nothing 'off-the-rack' about our products or quality.

Locally owned and operated

We don't just have showrooms...we have a factory. When you deal with Country you can be confident that every single step, from manufacturing to installation, can be traced back to one place, one name, right here in South Australia. There are no third parties, just first-rate products and service by people who live right here.

There's more!

Thanks for taking the time to understand the many factors that set Country Blinds apart. It's worth noting that we make and install more than Roller Blinds – in fact Country proudly manufactures an enormous range of interior and exterior window furnishings to suit all styles of home.
