ROLLER SHUTTERS

BY COUNTRY

- ✓ Locally owned & installed
- ✓ 35+ years of experience
- ✓ Custom built for all homes
- ✓ Smart home automation

NO ONE MEASURES UP TO COUNTRY

OUR ROLLER SHUTTERS DON'T JUST PROTECT — THEY HELP YOU LIVE BETTER.

At Country Blinds, we believe your home should feel safe, comfortable and beautifully yours.

Every shutter is designed and built right here in South Australia, using a tough aluminium shell and high-density insulation that keeps the heat out in summer and the warmth in through winter.

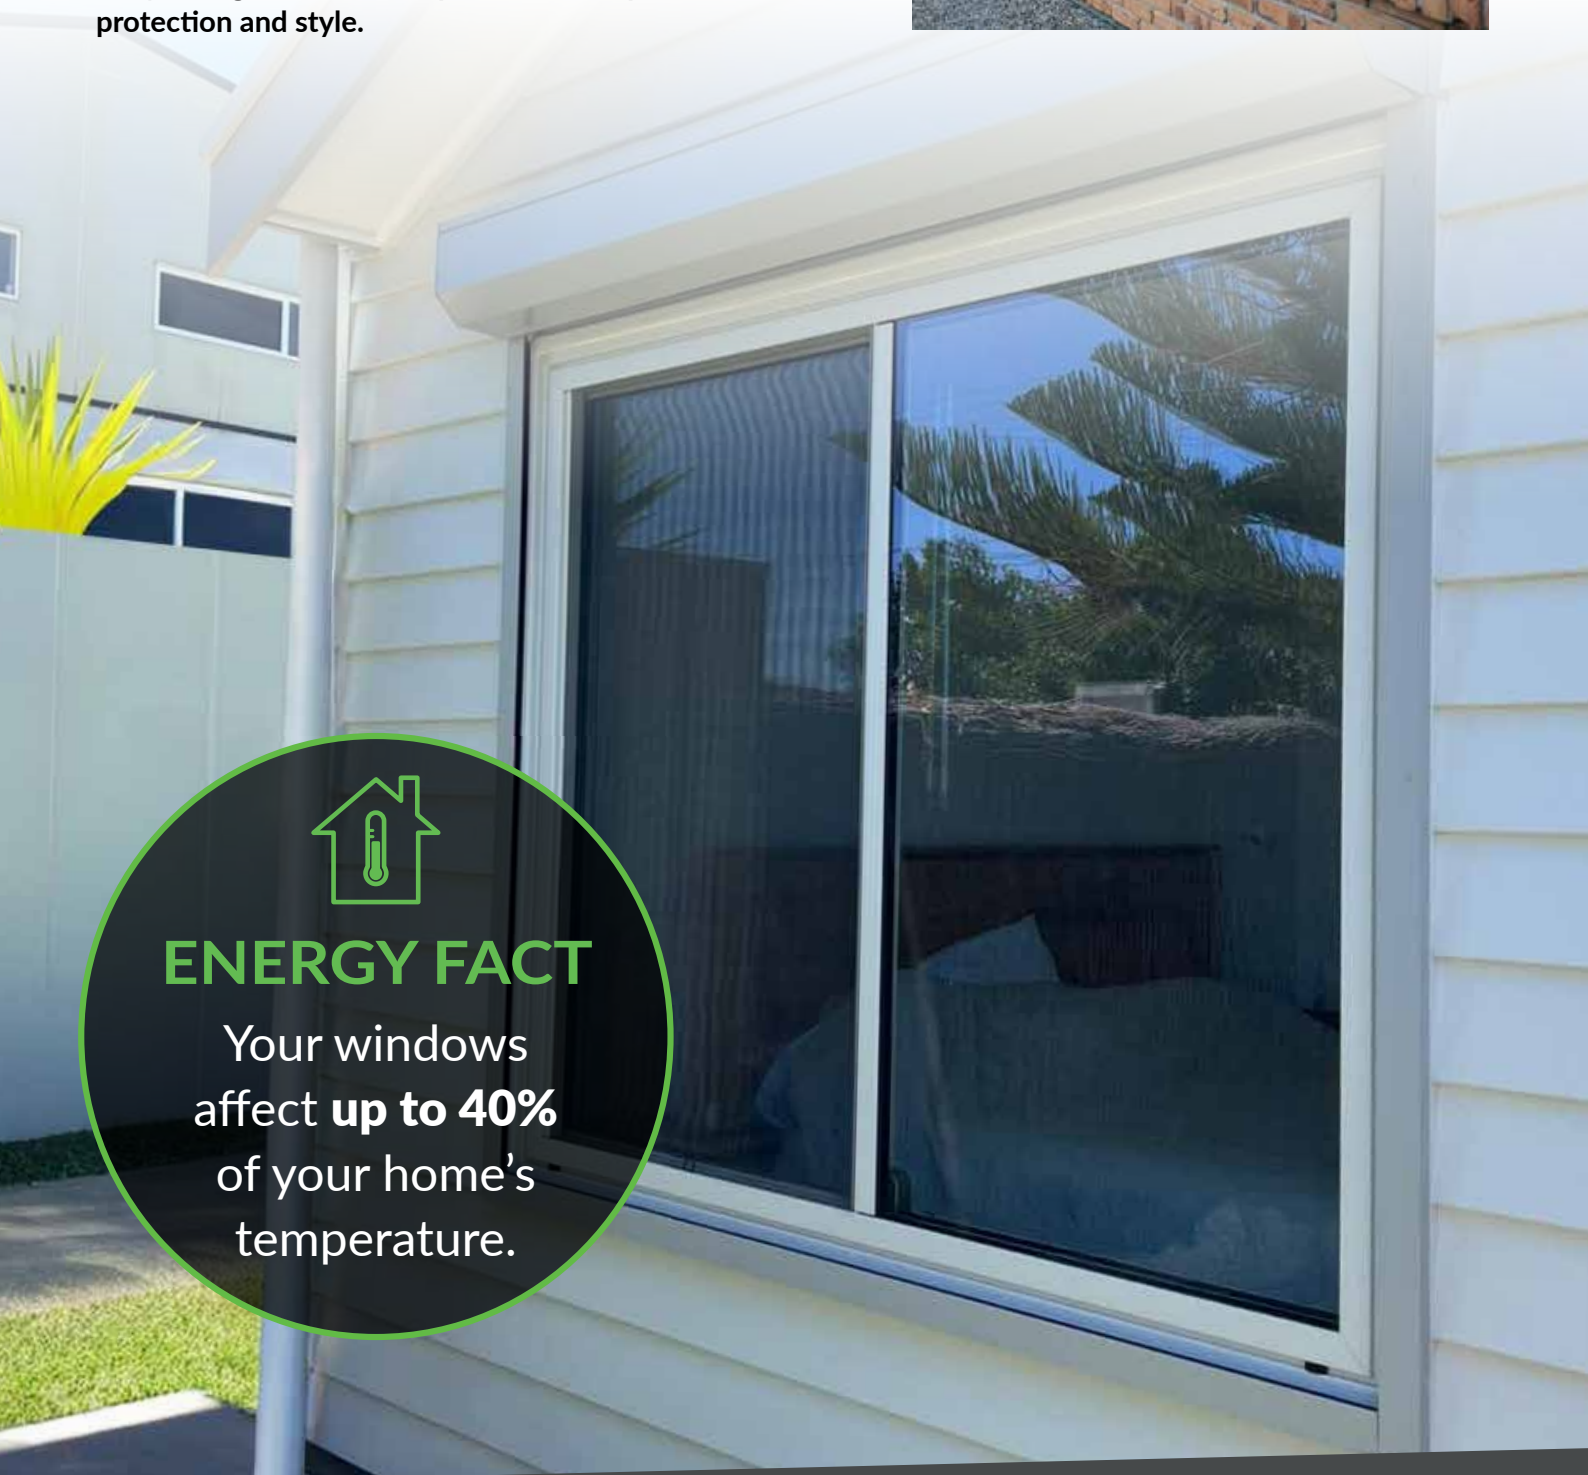

They're strong, smooth to use, and built to handle our South Aussie conditions year after year.

They look great too — the perfect mix of performance, protection and style.

ENERGY FACT

Your windows
affect **up to 40%**
of your home's
temperature.

FEATURES AND BENEFITS

SECURITY & PEACE OF MIND

Presents an immediate visible deterrent, protecting your home against burglary and vandalism.

CONTROL YOUR ENVIRONMENT

Prevents sunlight from fading your carpets and interior furnishings as well as acting as a long term protection for window frames.

INSULATION

Thermal insulation properties that reduce the effects of summer heat as well as retaining the warmth during the colder winter months.

ENERGY SAVING

External roller shutters improve thermal performance by **blocking up to ~90%** of solar radiant heat at the window and insulating your home, reducing reliance on air-conditioning and heating. Industry data indicates this can potentially **reduce household electricity bills** by up to **25-30 %**, delivering meaningful long-term savings and improved comfort year-round.

Sources: NatHERS, YourHome Guide (Windows & Shading)

Actual savings vary with home design, orientation and usage.

Up to ~90%
of solar radiant heat at
the window.

PRIVACY

Offers you privacy during both day and night. You control the extent by simply adjusting the shutter to suit your needs. When fully open the shutter curtain is completely out of sight leaving you unrestricted views through your window.

BUSHFIRE PROTECTION

Extensive CSIRO testing has achieved a 29kW/m² rating for AR400 Series Shutters (Technical Assessment 306).

BAL 40 protection is available if required with AE401 Extruded Shutters, while our standard shutter range provides effective protection against radiant heat from bushfires.

NOISE AND LIGHT

University tests have proven that roller shutters have a positive affect in the reduction of noise levels from outside of the home. Light and ventilation can be adjusted to create a pleasant, softly lit atmosphere.

SMART & FLEXIBLE CONTROL OPTIONS

We offer both 240V electric motors and 12-volt battery-powered Roller Shutters, so you can choose what works best for your home.

Control them with a wall switch or remote, link multiple shutters together, and keep everything running even during power outages.

You can even manage your shutters from your smartphone or connect them to Google Home or Amazon Alexa for extra convenience.
